A MORE SUSTAINABLE FUTURE

DELTA'S SUSTAINABILITY STRATEGY

Embed Sustainability in Everything We Do

Eliminate our Climate Impact From Flying

MINNESOTA SUSTAINABLE AVIATION FUEL HUB

Powered by the GREATER MSP Partnership

Many Leading Companies,
Institutions and Stakeholders

Our Ambition

Together, we are building an industrial-scale value chain for sustainable aviation fuel, anchored in Minnesota.

The aim is to deliver affordable, low-carbon SAF to the MSP International Airport as quickly as possible and then scale production to hundreds of millions, possibly billions, of gallons each year.

Our shared success will include helping decarbonize the airline industry, creating great jobs in Minnesota and across the North, and building a sustainable, large-scale market for regenerative agricultural practices and products.

Minnesota SAF Advantage

- **Large airline demand**
MSP aviation hub, and many corporate users
- **Vibrant business community**,
Sustainability mindset, and supportive gov
- **Research innovation capabilities**
BioMADE, industrial processing, clean tech
- **Clean Power**
And a green hydrogen pathway
- **Agricultural economy**
Including a regenerative future
- **Existing biofuels industry**
Including talent base

FOR YOUR TRAVELERS

ECO-FRIENDLY TRAVEL TIPS

PREFERENCE CARRIERS WITH EMISSIONS ACTION PLAN

Delta has committed to SBTi

BOOK NONSTOP FLIGHTS

Flying direct contributes to lower CO2 emissions

PACK LIGHT

Lighter planes reduce fuel burn

DOWNLOAD THE FLY DELTA APP

Save paper and stay touch-free by going digital

FLY NEW AIRCRAFT TYPES

Look for new aircraft types like our A350 or A220

BYOWB

Fill up your reusable water bottle after TSA to reduce single use plastics

CLOSE THE WINDOW SHADE

Keeping the shade open heats up the cabin
